SPRINGFIELD SOOT CLEANER
(Patented)

An authority on steam boilers says: "As a destroyer of boiler efficiency, soot is more potent than would be five times the thickness of asbestos spread over the heating surfaces."

THE SPRINGFIELD SOOT CLEANER prevents the collection of scale in fire tube boilers by keeping the flues perfectly clean and free from soot all the time.

It requires but ninety seconds to thoroughly clean the largest boiler and the work is accomplished while the boiler is in service without lowering the pressure. The boiler doors are never opened while the flues are being cleaned.

We guarantee a saving of 5 to 10 per cent if the Cleaner is used once every three hours, and the more frequently used the greater the saving.
